

```

1 package Project1_ASCII;
2
3 import javax.swing.*;
4
5 public class ASCII_Converter {
6     public static void main(String[] args) {
7         SwingUtilities.invokeLater(new Runnable() {
8             @Override
9             public void run() {
10                 ASCII converter = new ASCII();
11                 converter.setVisible(true);
12             }
13         });
14     }
15 }

```
